

## Conveyor Belt Repair

**Repair:** Spot / Puncture Repairs

**Material:** Rapid Repair (2 hour cure time)

**Situation:**

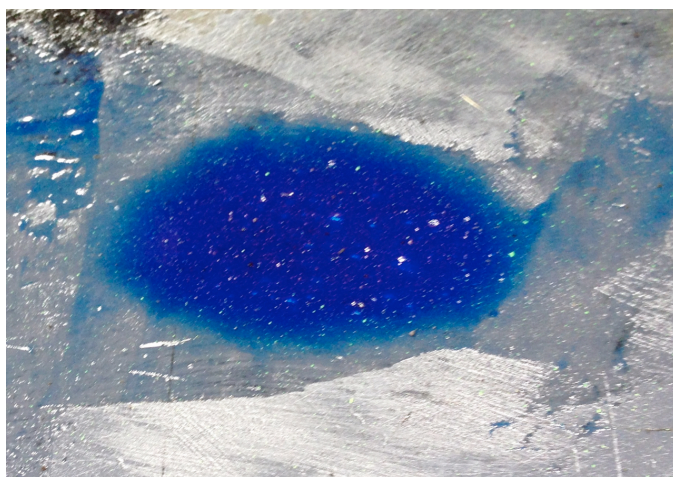

A material loading facility required had 40 spot repairs to the boom conveyor as a result of material being caught in between the pulley and the conveyor belt.

**Result:**

The repair was completed saving time and considerable cost and the belt was available for use at the completion of the shut down. There have been no issues with the repairs following the belt returning to full service.
