

## Polyurethane Coating

**Application:** Mixer Blades

**Location:** New South Wales

**Material:** Polyurethane protective coating (CoBond Protect)

**Situation:**

Our customer required a new solution that would protect and greatly reduce wear to their agitator mixer blades.

**Result:**

We developed a specifically modified high performance polyurethane coating that can be sprayed on to the agitator – mixer blades. Our coating provided full encapsulation of steel work and has proven its durability through outstanding chemical and abrasion resistance while in service.
