

CoBond Qik Fix

Qik Fix is a two-part 100% solids polyurethane repair kit used for the repair of rubber (fabric and steelcord), Nitrile and PVC conveyor belts and linings.

Qik Fix has been specifically engineered to be a high performance temporary conveyor belt repair product. It can be used to quickly and easily repair damaged conveyor belts; including skirt-line wear, tears, holes, splice and edge damage.

Offering superior adhesion strength, Qik Fix features excellent abrasion and tear resistance with the use of the appropriate substrate primer and surface preparation, an engineering grade bond can be achieved.

KEY FEATURES:

- 100% solids polyurethane repair kit
- 30 minute cure time
- Very simple and easy to use – no hand mixing required
- Excellent for emergency conveyor repairs
- Excellent wear strength and tear resistance

PROPERTIES
